PCRED Financial Products & Services

Working Capital

Working capital is the lifeline of any business, representing the funds required to manage daily operations such as purchasing raw materials, paying salaries, handling rent, and managing overheads. Without sufficient working capital, even profitable businesses can struggle with liquidity shortages, leading to operational bottlenecks.

With PCRED's Working Capital solutions, businesses can maintain steady cash flow, improve operational efficiency, and meet immediate financial obligations. We offer flexible, short-term loans customized to your industry, turnover, and specific needs, ensuring that your business continues to grow without financial interruptions.

Retail Loans

Retail loans are personal loans offered to individuals for fulfilling a wide variety of personal needs—ranging from purchasing a home or car to funding higher education, weddings, or even medical emergencies. These loans come with flexible repayment terms, tailored to match an individual's financial capability.

At PCRED, we simplify the loan process, provide competitive interest rates, and guide you through each step—from document submission to disbursement—making it easier for individuals to achieve their personal financial goals.

Government Schemes

The Government of India runs multiple credit and financial schemes to encourage entrepreneurship, promote MSME growth, support women-led businesses, and boost exports. These schemes often come with lower interest rates, subsidies, credit guarantees, and tax benefits

PCRED helps businesses unlock the true potential of these schemes by guiding them in eligibility checks, documentation, application processes, and execution. We act as a bridge between government policies and your business growth.

IPO (Initial Public Offering)

An Initial Public Offering (IPO) allows a private company to raise capital by offering its shares to the general public for the first time. This process helps businesses secure large-scale funding for expansion, acquisitions, or debt reduction, while also increasing their market visibility and credibility.

At PCRED, we provide comprehensive IPO support—from financial structuring and valuation to liaising with merchant bankers and regulatory bodies—ensuring that your business is fully prepared to go public successfully.

OTS (One-Time Settlement)

One-Time Settlement (OTS) is a mechanism where borrowers can negotiate with banks or NBFCs to settle outstanding debts for an agreed amount—usually lower than the total dues. It provides businesses and individuals facing financial distress with an opportunity to close loans amicably and start afresh.

PCRED assists clients in negotiating favorable terms with lenders, preparing documentation, and presenting viable repayment plans. Our expertise in dealing with banks ensures that clients secure the best possible settlement terms, improving their creditworthiness and financial standing.

Equity Financing

Equity financing involves raising capital by selling shares of a business to investors, including angel investors, venture capitalists, or private equity firms. Unlike debt financing, equity financing does not require repayment but provides investors with ownership stakes in the company.

Through PCRED, businesses gain access to a strong network of investors. We help in preparing investor pitches, structuring equity deals, and ensuring that funding aligns with your long-term growth strategy. This is especially suitable for startups and companies in expansion phases looking for strategic partners, not just money.

Bill Discounting

Bill Discounting is a financing method where businesses sell their accounts receivable (unpaid invoices) to a financial institution at a discount, to get immediate cash before the due date. It helps bridge cash flow gaps caused by delays in client payments.

With PCRED's bill discounting services, businesses can improve working capital cycles, take on new projects confidently, and reduce dependency on external loans. This solution is ideal for businesses dealing with large clients who typically have extended payment cycles.

Export Finance

Export finance is a specialized funding solution designed to support exporters in managing the financial demands of producing, shipping, and selling goods overseas. It covers both pre-shipment (production phase) and post-shipment (payment waiting phase) financial needs.

PCRED provides expert export finance solutions tailored to suit businesses engaged in international trade. We assist exporters in securing the necessary funds with minimal collateral, leveraging schemes supported by EXIM banks or government agencies when applicable.

Startup Funding

Startup funding refers to the financial support provided to new and growing businesses to develop products, enter markets, or scale operations. It can be raised in the form of debt, equity, grants, or convertible instruments.

PCRED's startup funding service connects promising ventures with appropriate sources of capital, whether it's angel investors, venture capitalists, or government-backed startup schemes. We also assist in pitch preparation, financial modeling, and strategic advisory to improve funding success rates.

Debt Syndication

Debt Syndication is the process of raising large debt requirements by involving multiple financial institutions that collectively provide the funds. This is typically used for large projects or expansion where single lenders may not be willing to lend the full amount.

PCRED facilitates debt syndication by leveraging its relationships with multiple banks and NBFCs. We handle the negotiation, structuring, and management of the entire syndication process, ensuring businesses get optimal terms and adequate funding without compromising on flexibility.

Project Finance

Project Finance involves securing long-term funding for large infrastructure or industrial projects, where repayment comes solely from the project's future cash flows. This model allows businesses to finance massive undertakings without overburdening their balance sheet.

PCRED specializes in structuring project finance deals by working with banks, investors, and regulatory authorities to ensure complete compliance and maximum viability of the project's financial structure.

Government Grants

Grants are non-repayable financial aids offered by governments, international organizations, or private institutions to support innovations, technology development, social initiatives, or entrepreneurship.

PCRED assists clients in identifying suitable grant opportunities, preparing high-quality applications, and maximizing their chances of approval. We focus on connecting businesses and social ventures with funds that can significantly advance their growth or impact goals.

Supply Chain Finance

Supply Chain Finance (SCF) is a financial arrangement that benefits both suppliers and buyers. It allows suppliers to get early payments on their invoices at attractive rates, while buyers can extend their payment terms without affecting supplier relationships.

PCRED acts as a facilitator between businesses, their vendors, and financial institutions to implement effective SCF programs. By improving cash flows for suppliers and offering credit flexibility to buyers, SCF strengthens the entire business ecosystem.
